the molecular genetics of aging or life span determination is an expanding field one reason is because many people would consider it desirable if human life span could be extended indeed it is difficult not to be fascinated by tales of the life and death of people who have succeeded in living a very long life because of this we have placed at the head of this book the chapter by perls et al on centenarians and the genetics of longevity perls and his coauthors convincingly argue that while the average life expectancy might be mostly determined by environmental factors because the average person has an average

genotype extremely long life spans are genetically determined of course studying humans to uncover the genetics of aging is not ideal not so much because one cannot easily perform experiments as because they live such a long time this is why most of this book describes the current state of research with model organisms such as yeast worms flies and mice j aswinski focuses on yeast and how metabolic activity and stress resistance affect the longevity of *saccharomyces cerevisiae* in the process he discusses the concept of aging as applied to a unicellular organism such as yeast and the importance of metabolism and stress resistance for aging in all organisms

this volume addresses oxidant reduction or redox and antioxidant sensitive molecular mechanisms and how they are implicated in different disease processes possible strategies to pharmacologically and or nutritionally manipulate such redox sensitive molecular responses are emphasized reactive species as intracellular messengers redox regulation of cellular responses clinical implications of redox signaling and antioxidant therapy

this innovative reference explores a wide selection of topics associated with aging providing a solid understanding of the significance and molecular basis of the aging process and charting the course of future research in the area stresses the interplay of mitochondria mitochondrial dna oxidants and antioxidants featuring the research
